# 03 HORNET EP

## WORLD'S MOST POPULAR

The Lil' Bubba® *Hornet EP* Curb Machine creates continuous decorative concrete borders and walkways allowing the user to follow any existing landscape bed design, placing borders as close as two inches to a stationary object while making tight turns. The patented *Elliptical Plunger Drive* eliminates concrete bridging and creates a consistent flow, scoring the concrete to prevent “flat spots” and “weak areas.”

**Kohler Command Pro CH245 / 4.5 HP**

# 05 SPITFIRE EPC

## MASTER OF LARGE CURBS

The Lil' Bubba® *Spitfire EPC* is designed to make quick work of larger curb shapes and is the perfect solution for parking lots, wheel blocks and any commercial curb installations feeding from a concrete truck. While not a substitute for the *Hornet EP*, the *Spitfire EPC* allows the curbing contractor to expand into the commercial curb market.

With the "EPC Mold Adapter" this machine will run the standard EP molds, including the 24" walkways.

# VIPER HD

## NO SHOVEL. NO WORRIES.

The Lil' Bubba® *Viper HD* is the preferred machine for fast and easy curb preparation. Equipped with the 9" wide curbing rotor, it quickly cuts up to a 4" deep by 9" wide trench in the hardest clays. The steerable wheels make fancy curves and tree rings easy. The debris removed is placed neatly on the flowerbed side of the trench and can be raked back behind the curb after the install for the fastest preparation possible.

# THE DIFFERENCE

NOT ALL MACHINES ARE EQUAL!

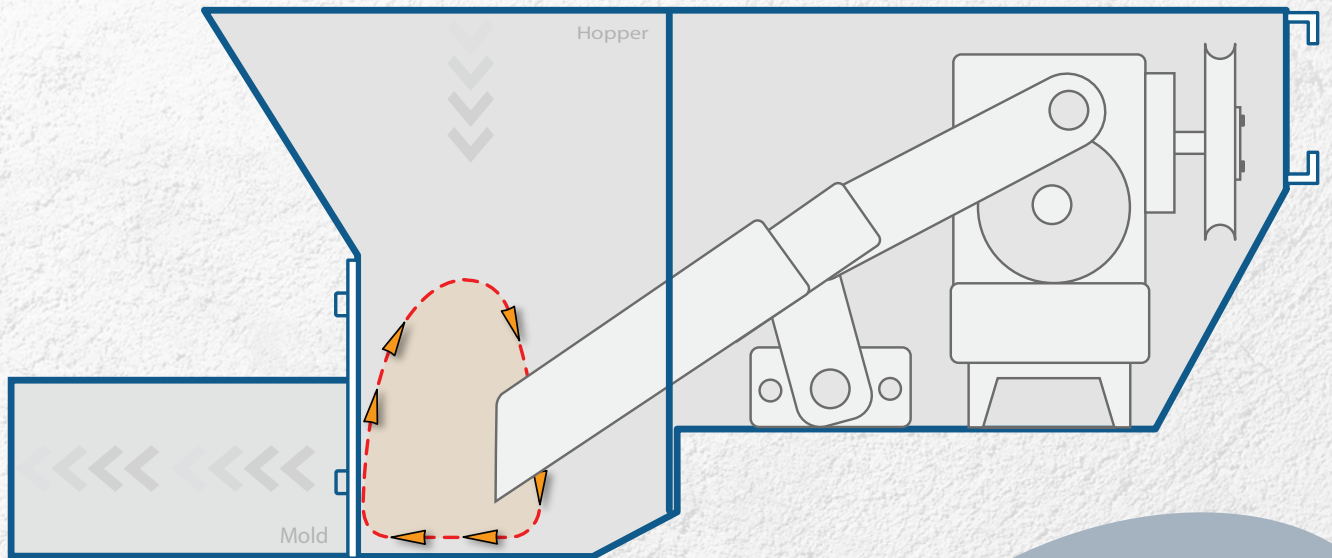

World of Concrete

US Patent Office

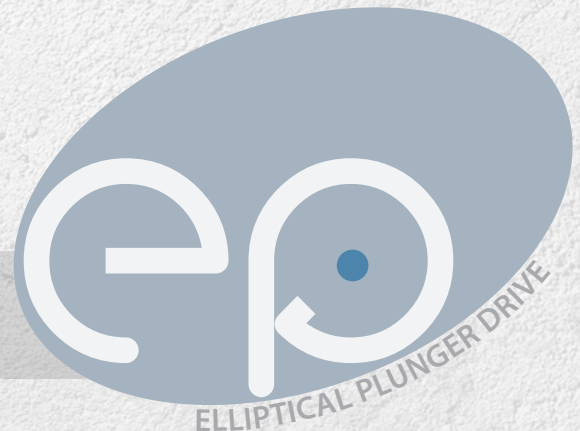

Concrete Contractor

## WHAT IS ANTI-BRIDGING?

It's literally the difference between a curb job and a professional decorative curb system. Save time and money and learn more about the industry's only patented drive - the Elliptical Plunger. It makes an incredible difference in concrete longevity!

A collage of industrial manufacturing scenes. The top half shows a welder in a brown protective suit working on a large metal component, with a bright blue and white welding arc and a shower of orange sparks. The bottom left shows a grinding wheel on a red machine creating a shower of sparks on a metal plate with cutouts. The bottom right shows a grinding wheel on a machine grinding a metal part, with a large amount of white coolant spray. The text "HIGH-TECH HAND CRAFTSMANSHIP" is centered in the middle of the collage.
