THE DIFFERENCE

NOT ALL MACHINES ARE EQUAL!

THE CONCRETE EDGE
World of Concrete

THE CONCRETE EDGE
US Patent Office

THE CONCRETE EDGE
Concrete Contractor

WHAT IS ANTI-BRIDGING?

It's literally the difference between a curb job and a professional decorative curb system. Save time and money and learn more about the industry's only patented drive - the Elliptical Plunger. It makes an incredible difference in concrete longevity!

HIGH-TECH HAND CRAFTSMANSHIP

05 HORNET EP

WORLD'S MOST POPULAR

The Lil' Bubba® *Hornet EP* Curb Machine creates continuous decorative concrete borders and walkways allowing the user to follow any existing landscape bed design, placing borders as close as two inches to a stationary object while making tight turns. The patented *Elliptical Plunger Drive* eliminates concrete bridging and creates a consistent flow, scoring the concrete to prevent “flat spots” and “weak areas.”

07 SPITFIRE EPC

MASTER OF LARGE CURBS

The Lil' Bubba® *Spitfire EPC* is designed to make quick work of larger curb shapes and is the perfect solution for parking lots, wheel blocks and any commercial curb installations feeding from a concrete truck. While not a substitute for the *Hornet EP*, the *Spitfire EPC* allows the curbing contractor to expand into the commercial curb market.

With the "EPC Mold Adapter" this machine will run the standard EP molds, including the 24" walkways.

HUSTLER 4WD

NO PUSHING. NO LIFTING.

The Lil' Bubba® *Hustler 4WD* Power Barrow is the ultimate motorized workhorse and the fastest and easiest way to carry concrete from the mixer to the Lil' Bubba® Curb Machine. The Hustler negotiates inclines and rough terrain with ease; has breaks, and it can be used to quickly deliver mulch or rock on the worksite with its full-tilt dumping hopper - *like having another worker, but better.*

1 1 VIPER HD

NO SHOVEL. NO WORRIES.

The Lil' Bubba® *Viper HD* is the preferred machine for fast and easy curb preparation. Equipped with the 9" wide curbing rotor, it quickly cuts up to a 4" deep by 9" wide trench in the hardest clays. The steerable wheels make fancy curves and tree rings easy. The debris removed is placed neatly on the flowerbed side of the trench and can be raked back behind the curb after the install for the fastest preparation possible.
